Communication

Problem-Solving

Interpersonal Skills

Collaboration

Creativity

Attention to Detail

## Languages

**Spanish:** Native

**English:** B2

**German:** A1

## Education

**National Technological University (UTN FRSFCO):** Software development  
March 2021 - May 2024

# Professional Experience

## Vulletic EV Charger (October 2022 - At present):

I work as a backend developer, taking on responsibilities such as developing, reviewing, and supporting different projects built on .NET. In this role, I'm also in charge of deploying applications to different environments (development, test, and production) using technologies such as PM2, Systemd, and Docker.

I manage the DNS records and domains of our applications through Cloudflare. Finally, I configure and control our Ubuntu servers via Grafana.

# About me

I am a backend developer focused on developing .NET applications with a robust and complete architecture. I am doomed to learn and improve my cloud computing skills, from networking management and security rules to designing and understanding powerful infrastructure.

My goal is to have the opportunity to contribute to different enriching projects. I can learn from experienced people and enhance my current skills and grow as a professional.
